

# Dedicated Web Application Hosting

## Dedicated Web Application Hosting with no upfront capital costs.

### Overview

Dedicated Web Application Hosting—brought to you by ExoNetworkx and powered by Savvis—delivers a fully managed, dedicated, hosted environment that helps you lower IT costs and total cost of ownership, while improving the performance of Web applications. Simply subscribe, and Dedicated Web Application Hosting will take it from there. No upfront capital is needed. From the operating system to the server, rack, network and facility, Dedicated Web Application Hosting erases the day-to-day management burden—you still retain control over your environment—while freeing you up to focus on more strategic business initiatives.

### Affordable, All-in-One Web Hosting

Dedicated Web Application Hosting features a dedicated server designed for Web hosting with floor space and power provided by world-class hosting provider Savvis. You choose the operating system (Red Hat Enterprise Linux or Microsoft Windows) and Web application software (Apache or Microsoft IIS), and procurement, licensing and deployment is handled for you. After deployment, Dedicated Web Application Hosting manages your critical infrastructure, including complete operating system management, monitoring, event management and data collection. No need to worry about patches and upgrades either. All patches and service pack upgrades that may impact your applications will only be added to your servers after your approval. With Dedicated Web Application Hosting, we'll keep your applications running at peak performance, so you can keep your business running at peak performance.

### Maximum Availability, High Performance and Hardened Security

For a single dedicated server, Dedicated Web Application Hosting offers 98.5% reliability for near-perfect availability. For redundant configurations, reliability jumps to 99.9% to ensure your Web applications are available to users at all times. Plus, you'll receive 1 Mbps Internet bandwidth network service, with additional bandwidth available based on usage, for maximum throughput.

Dedicated Web Application Hosting also includes a DMZ utility firewall (10GB) for added security and nightly data backups (250GB) for greater business continuity and faster disaster recovery. You can also customize the hosting environment to meet specific business and security needs.

### Key Benefits

- ✓ Predictable monthly expenses
- ✓ No upfront capital
- ✓ Start-up fees included
- ✓ 10MB utility firewall included
- ✓ Enterprise-class security
- ✓ Near-perfect reliability
- ✓ 24/7/365 expert support

## Simple Setup & Administration

Deploying Dedicated Web Application Hosting is easy. Just subscribe and choose deploying software and providing setup and configuration to the day-to-day your applications, and we'll take it from there—from procuring software licenses, monitoring and management of your environment. You still have control over your environment via a robust Web portal that allows you to manage all aspects of the service, such as monitoring, incident and problem management and reporting. Plus, our dedicated and expert support specialists are available 24/7/365 to give you a hand.

## Proven, Best-in-Class Provider

Savvis has the proven experience of delivering fully managed, dedicated hosting environments for enterprises with some of the most demanding, complex requirements, including high-traffic websites large and complex websites and websites with a high volume of users at one time. Dedicated Web Application Hosting provides space and power in your choice of world-class, ISO-certified data centers located in Chicago, Dallas, New Jersey, Washington DC and Boston. The infrastructure is tuned for continuous support of Web hosting and Internet operations. To get started, simply select the package that best meets your needs and we'll take care of the rest.
