SharePoint 2010 Server Farm for Enterprise

Affordable, one-click SharePoint server farm adds up to significant time and cost savings.

Overview

Managing an enterprise SharePoint environment comes with its own set of challenges. Not only is there a significant investment in hardware, the hardware must be set up, software must be deployed and the entire environment requires constant maintenance. That adds up to dollar signs.

With SharePoint 2010 Enterprise Server Farm, brought to you by ExoNetworx and powered by Amazon Web Services (AWS), you can quickly launch a multi-server environment with a simple click. No servers to maintain or software to deploy. Instead, you'll have a pre-configured, production-grade SharePoint cloud infrastructure that comes ready to integrate into your Active Directory structure— and significantly reduces costs.

Fast, One-Click SharePoint Environment

No longer do you have to spend time on a complex and costly install of SharePoint. SharePoint 2010 Enterprise Server Farm offers fast, one-click deployment of multi-server environments within AWS, yet you still control your assets via a Virtual Private Cloud. No specifying, qualifying, ordering and waiting for hardware—or racking and stacking servers, pulling cables or enabling power pulls after equipment arrives.

Server farms support 1000, 2500 or 5000 seats, and include up to 2TB of storage as well as pre-scaled application, presentation and database servers. Not only will you save time and money on hardware and infrastructure setup, you'll have more time for more strategic projects that align with your core business.

World-Class Security, High Availability

With your thoroughly tested SharePoint infrastructure running within AWS, you can count on a highly resilient environment with enterprise security best practices baked in from start to finish. AWS services and data centers have multiple layers of operational and physical security to ensure the integrity and safety of your data, and the secure, durable technology platform features industry-recognized certifications and audits including PCI DSS Level 1, ISO 27001, FISMA Moderate, HIPAA and SSAE 16. SharePoint 2010 Enterprise Server Farm also includes full site backup with geographic separation for fast recovery.

Key Benefits

- ✓ Fast, one-click deployment
- ✓ Predictable monthly expenses
- ✓ Microsoft license portability
- ✓ Easy integration
- ✓ Full site backup
- ✓ High availability and resiliency
- ✓ Up to 2TB storage included
- ✓ 24/7/365 support

ExoNetworx

Lower Costs, Greater Productivity

Whether you're migrating to SharePoint 2010, want the ease and simplicity of SharePoint Server or just want to lower your costs, SharePoint 2010 Enterprise Server Farm makes migrating to a new environment easy. There is no hardware to consider, order, buy and install, and you can use your existing SharePoint Server licenses—no additional Microsoft license fees are required. Plus, a one-click deployment saves you the time required to set up and maintain a new environment. Productivity goes up, costs go down and downtime is significantly minimized.

World-Class Services

No time to migrate and integrate your new SharePoint environment? With SharePoint 2010 Enterprise Server Farm, you can take advantage of a full complement of services, including migration and configuration services from launch to production and Active Directory integration services.

Key Benefits

- Predictable Costs – Subscribe on a monthly basis to maximize resources and better control IT costs.

- One-Click Deployment – Launch your SharePoint 2010 Enterprise Server Farm with a simple click.

- Minimal Downtime – Easily migrate data to your SharePoint 2010 Enterprise Server Farm without the downtime required for physical servers.

- Cost Efficient – Requires no hardware purchases, installs or maintenance, and allows you to port existing Microsoft SharePoint Server licenses to maximize your current investments.

- Integration-Ready – Includes application, presentation and database servers with dedicated Active Directory that's ready to be integrated into your existing Active Directory structures.

- Multi-Layer Security – Protects data with multiple layers of operational and physical security to ensure the integrity and safety of your data.

- Flexible Options – Choose the server farm that best meets your needs—a 1000, 2500 or 5000 seat deployment with up to 2TB of storage included.

- 24/7/365 Support – Count on an expert support team that provides 24/7/365 assistance as needed.

ExoNetworx Inc.

Since 2003, ExoNetworx has been a trailblazer in delivering IT resources in an easy and consumable format.

Today that format is known as a CLOUD service and it is all about using and paying for resources as you need them with the knowledge that it is being done better and cheaper than if you did it in-house.

ExoNetworx is the NEW utility you can subscribe to - Consume what you need when you need it with no long-term obligations or hidden costs. From pre-packaged SW solutions to providing a highly reliable, scalable, low-cost infrastructure platform in the cloud.

We understand these challenges and that is why we are 100% focused on IT infrastructure services so you can focus on what matters to you – strong business results.
