ExoNetworx

Virtual Private Data Center

An affordable test and development environment in hours, not weeks or months.

Overview

The demand for new applications is skyrocketing, but it can often take weeks, even months, to procure and provision the resources needed for a test environment.

ExoNetworx Virtual Private Data Center (VPDC) Test & Development, powered by Savvis, delivers a powerful, affordable way to define, configure and deploy a full virtual data center—without procuring, installing, configuring or managing any hardware. Simply build, update and test applications within an easily configured, on-demand cloud infrastructure to speed release cycles and improve product quality. With complete control over costs, you can take as little or as much time as you need to get it right.

On-Demand, Enterprise-Class Test Environment

ExoNetworx VPDC slashes the weeks and months needed to procure, install, configure, or manage any hardware to mere hours with a powerful on-demand capability for defining, configuring, and deploying a full virtual data center. It integrates servers, storage, network access, security controls and basic image management and is built on an enterprise-grade infrastructure that provides enterprise-class availability, reliability and security.

Highly Available, Thoroughly Reliable

ExoNetworx VPDC is built on best-of-breed hardware and industry-leading virtualization technology, and delivers redundancy at all levels of the infrastructure. Not only does it offer compute node and network path redundancy, it provides storage mirroring to ensure 100% availability.

World-Class, End-to-End Security

ExoNetworx VPDC delivers end-to-end security with the strictest policies and procedures, and ensures compatibility between newer security protections and more traditional, physical security controls. Comprehensive, integrated security features and processes optimize the cost/security tradeoff for each VPDC. Cost is optimized for test/development, so the system configures the VPDC with a single public VLAN, plus authenticated access through security access control lists (ACLs).

Key Benefits

- ✓ Easy-to-use portal

- ✓ 99.99% VPDC availability

- ✓ 100% infrastructure availability

- ✓ Massive scalability

- ✓ Pay-per-use, by-the-hour service

- ✓ Server parking available

- ✓ Hybrid cloud support

- ✓ No setup fee or minimum terms

ExoNetworx

Massive Scalability

With its modular design, ExoNetworx VPDC offers massive scalability so you can dynamically scale compute resources up or down as needed. An online services catalog allows you to instantly provision services, along with additional bandwidth and storage capacity so that applications can run at peak efficiency. Servers can also be "parked" to keep costs low.

Fast, Drag-and-Drop Build and Configure

ExoNetworx VPDC includes a simple, Web-based drag-and-drop interface designer. This self-service portal gives you access to tools for data center creation, configuration and ongoing management. You'll also have access to a rich suite of data center services, including virtual hosts with a selection of pre-loaded operating systems, virtual security appliances, virtual storage devices and utilities. Just drag and drop the desired objects onto the designer palette, configure custom parameters and activate and deploy the data center when complete.

Flexible, Pay-As-You-Go Billing

ExoNetworx VPDC offers a pay-per-use model that helps you control costs. Choose services as you need from them an online services catalog, and "park" servers for greater efficiency. Billing can be done hourly or monthly to best meet your needs. There are no added fees for setup, no monthly subscriptions and no minimum contracts to fulfill.

Key Benefits

- Fast Deployment – Deploy a full virtual data center within hours, not the weeks or months it normally takes to procure, configure and deploy hardware.

- Usage-Based Pricing – Control costs by paying only for what you use—no additional fees for setup, security or monthly subscriptions and no minimum contract is required.

- Enterprise-Class Security – Features comprehensive, integrated security that's optimized for the test and development environment.

- High Availability – Ensures the highest reliability with 99.99% SLAs for VPDC availability and 100% SLAs for infrastructure availability.

- Massive Scalability – Dynamically scale compute resources up or down as needed to thoroughly test and develop applications.

- Easy-to-Use Portal – Includes a self-service portal with access to tools for data center creation, configuration and ongoing management, as well as a full suite of data center services.

- 24/7/365 Support – Count on an expert support team that provides 24/7/365 assistance as needed.

ExoNetworx Inc.

Since 2003, ExoNetworx has been a trailblazer in delivering IT resources in an easy and consumable format.

Today that format is known as a CLOUD service and it is all about using and paying for resources as you need them with the knowledge that it is being done better and cheaper than if you did it in-house.

ExoNetworx is the NEW utility you can subscribe to - Consume what you need when you need it with no long-term obligations or hidden costs. From pre-packaged SW solutions to providing a highly reliable, scalable, low-cost infrastructure platform in the cloud.

We understand these challenges and that is why we are 100% focused on IT infrastructure services so you can focus on what matters to you – strong business results.
